

CBAM Reporting

Automate CBAM Reporting

Save time, reduce errors, and ensure CBAM compliance effortlessly.

Failure to report CBAM on time or submitting inaccurate reports exposes you to fines, legal consequences, and reputational harm

Preparing quarterly CBAM reports is time-consuming, error-prone, and resource-intensive, requiring data from multiple suppliers and constant updates to meet evolving regulations and avoid hefty fines. Sievo's CBAM Reporting solution quickly recognizes suppliers in scope, automates data collection, simplifies report preparation, and ensures seamless report submission. Simplify your work to save time and reduce complexity while minimizing the risk of costly mistakes.

It's difficult to determine which suppliers fall under the CBAM scope. Identify CBAM-relevant suppliers quickly and manage compliance efficiently, to free up your time to focus on strategic sustainability initiatives.

Gathering and managing accurate supplier data is very challenging. Streamline CBAM supplier data collection and ensure timely, accurate submissions, while monitoring responses for a simplified and efficient process.

With tight deadlines it's easy to miss the reporting window. Automate your CBAM reporting process, reduce manual work and potential mistakes, so you can focus on your core activities and reclaim hours spent on data entry for reporting.

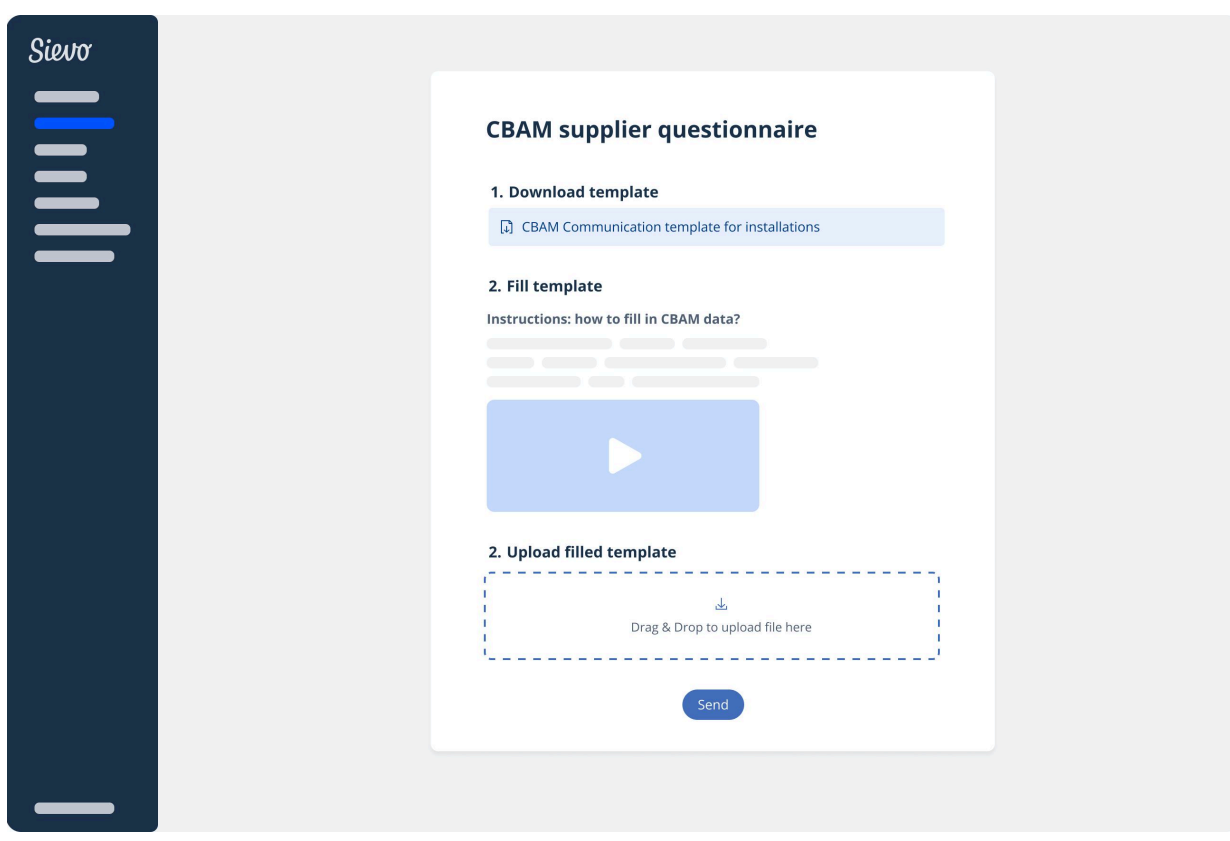

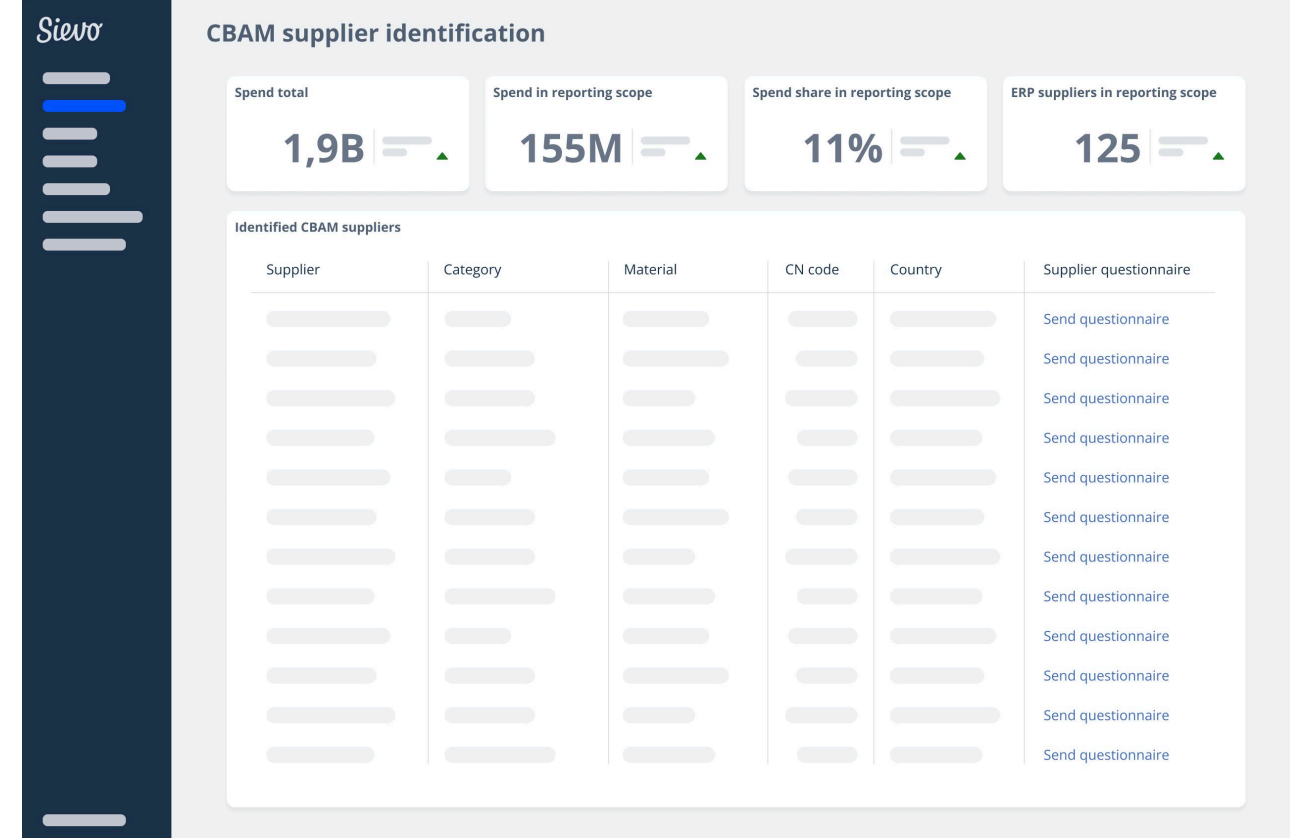

It's a daunting task to keep up with changing regulations and update reporting in real time. We continuously update our solutions to align with the evolving CBAM compliance standards, ensuring your reporting process remains compliant without any extra effort from you.

Automate, Simplify, Comply.

Imagine having up to 50% of your CBAM report already filled in, giving you a head start on swift submissions.

Identify and focus only on suppliers subject to CBAM

Identify and focus on relevant suppliers to save time, resources and cover potential blind spots, in your compliance process. Sievo's CBAM suggestion panel helps you identify suppliers subject to CBAM, using the latest, updated supplier data. By assessing suppliers and automatically filtering out those not subject to CBAM, you can prioritize efficiently and reduce manual assessment.

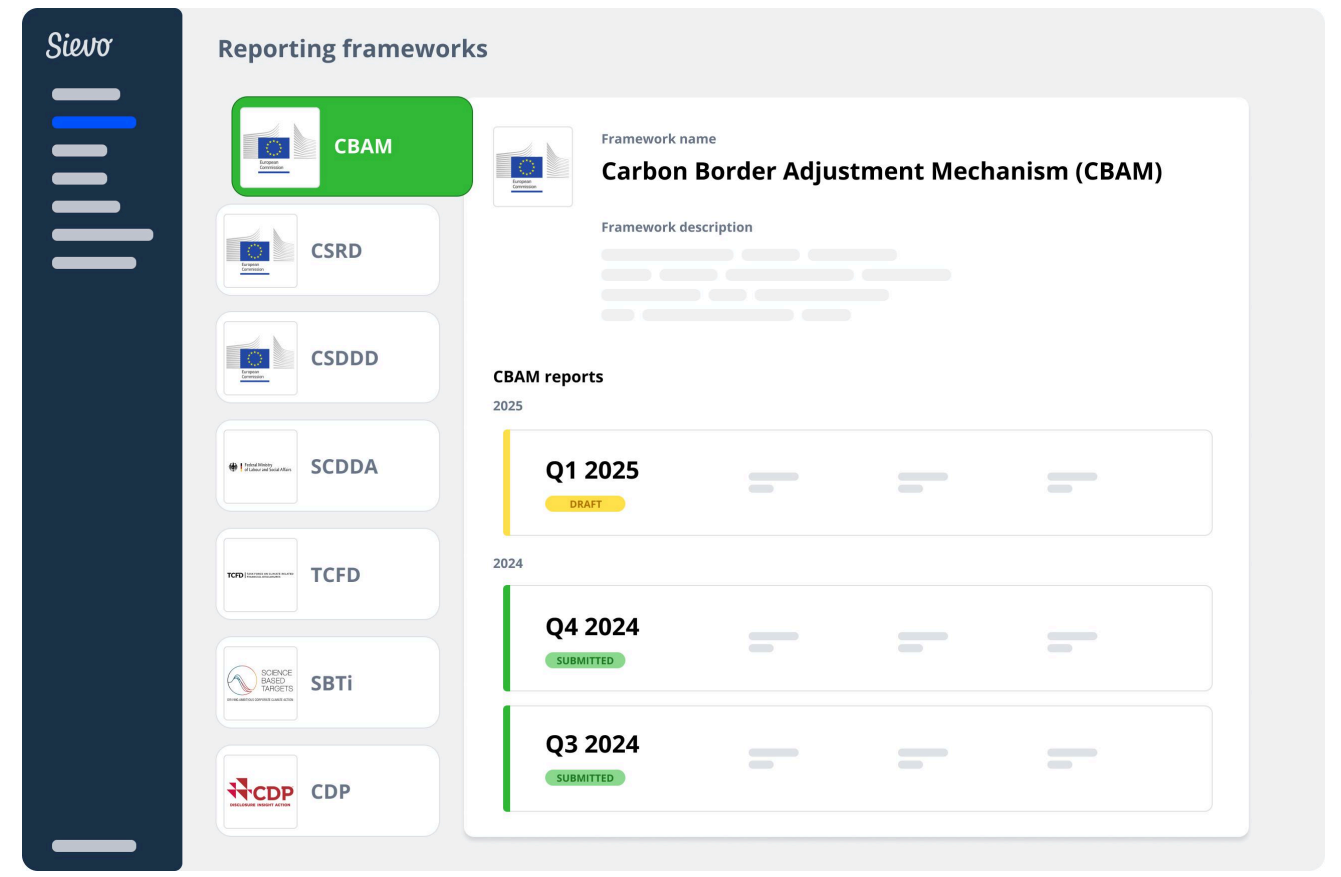

Simplify data collection and improve collaboration with suppliers

Collect CBAM data with an easy-to-use supplier questionnaire. Gather material-level data—specific embedded emission factors, production methods, supplier and installation contact information. Monitor supplier submissions to ensure timely data collection and reduce the workload of data gathering and follow-ups. Once collected, CBAM data is effortlessly integrated into reporting templates.

Automated reporting to reduce manual effort and ensure compliance

Import CBAM data from diverse sources and generate CBAM-ready reports directly from Sievo, to ensure compliance with minimal manual adjustments. Don't worry about data integrity, the report validation tools minimize errors by verifying correct field completion. Collaborate seamlessly with your team using multi-user access and management capabilities to handle multiple reports and track progress with intuitive status indicators.

Simplify regulatory compliance with automation and user-friendly capabilities

Suppliers in Scope Optimize reporting by automating data enrichment and merging CBAM data from multiple supplier sources.

Intelligent filtering with CBAM suggestion panel to focus on relevant suppliers among hundreds or thousands in your network.

Data Import Easily handle suppliers' Excel data; edit and validate reports within the system to ensure accurate submissions.

Generate Reports Complete reports and generate XML files, simplifying the process for straightforward, efficient submissions.

“It is great to have a breakdown of our suppliers' sustainability targets, so we can see where we would end up in a certain year. This is something which has usually taken a lot of time, now it's 50x faster by just opening Sievo.”

Stefan Niesler – Senior Expert Procurement at Deutsche Telekom

“Having our GHG emission data accessible with high granularity levels at our fingertips via Sievo is a key differentiator. It will accelerate our objective to reduce impact on the environment.”

hikma. Francois Rousselot – Group Head of Procurement at Hikma

Sievo is the Carbon Management Leader with Quickest Deployment Awarded by SpendMatters

Sustainable procurement for large enterprises

See how Sievo can help you unlock deeper insights, drive sustainability, and simplify CBAM reporting—so you can stay ahead of emerging regulations.
