Elevate your sustainability goals

In today's business, aligning procurement strategies with robust sustainability goals is not just an option—it's a necessity. The Science Based Targets initiative (SBTi) offers a clear and effective pathway for companies committed to reducing their carbon footprint in line with the Paris Agreement. By integrating SBTi data into your Sievo Spend Analytics, your organization can now harness the power of actionable insights to drive meaningful environmental change. Lead with purpose and make sustainability the cornerstone of your procurement decisions.

Track suppliers' commitment and progress towards Emission **Reduction Targets:** Collect and analyze data on your suppliers' emissions, targets, and reduction strategies, with real-time insights and ensure they comply to their commitments.

suppliers matched with SBTi targets

Benchmark your suppliers against similar suppliers reporting to the SBTi: Compare your suppliers' emission reduction progress with those of similar suppliers in the SBTi to encourage improvement and competitiveness.

Identify suppliers without targets or significant

progress: Pinpoint suppliers lacking targets or progress, and engage directly to understand their challenges and provide support or incentives to motivate action.

Explore alternative suppliers within the SBTi network: Consider SBTi network alternatives for suppliers not meeting commitments, assessing their emission efforts alongside to their associated cost, quality, and reliability.

Manage your supply chain's environmental impact

With over 7,500 companies already involved, SBTi is setting the standard for climate action. Don't let your organization fall behind.

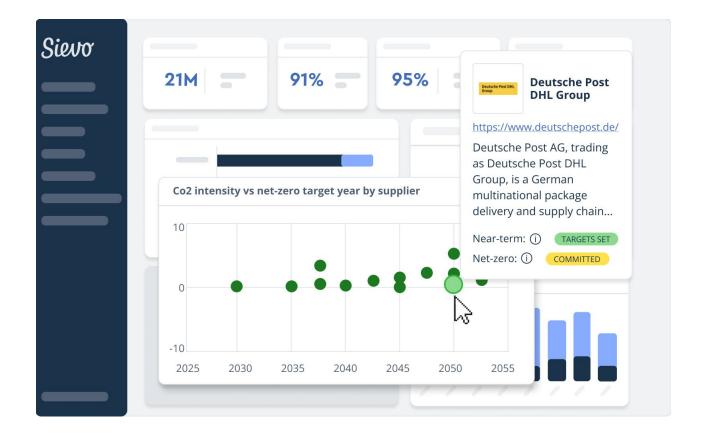

Holistic supply chain overview

Gain a detailed overview of how much of your procurement spend is covered by suppliers committed to Science-Based Targets. This allows for a precise understanding of your supply chain's sustainability footprint, enabling targeted actions towards areas with the most significant impact. Detect suppliers which take a

Sievo	Total gap now	Forecasted gap in the target year	Net-zero target year
	Your reduction velocity progress		155
	Supplier SBTi information		ar-term: Net-zero: RGETS SET TARGETS SET
		TAF	MMITTED COMMITTED RGETS SET TARGETS SET T SET NOT SET
		TAF	RGETS SET TARGETS SET

significant portion of your procurement budget, but have no commitments or no progress towards their sustainability targets and act now.

Accurate assessment of suppliers' sustainability

Quickly discern which of your suppliers are actively reducing their carbon footprint and which are lagging towards their emission targets. Make informed decisions and drive a stronger commitment to sustainability throughout your supply chain, by discovering suppliers with high impact to your supply chain and when necessary, find alternative suppliers within the SBTi network.

Unmatched process efficiency

By reducing the manual workload associated with tracking and reporting on supplier commitments, Sievo's SBTi integration frees up valuable time for your team. This allows you not only to focus on strategic initiatives that drive your company's sustainability agenda forward, but also makes your emission reduction actions more impactful and efficient.

Sievo	Initiative name Switch to SBTi		Start date	End date	Savings 597k
