

Sievo Community Data

Empower decisions with Sievo's proprietary insights & benchmarks

Unlock new frontier of value capture with unique insights and savings opportunities fueled by community benchmarks.

Access the largest database in procurement analytics

Unlock insights and trends from across Sievo's customer base that your company could not obtain on their own

2%+ Global GDP

spend data equivalent processed annually

100+ mil. suppliers

mapped and enriched by Sievo AI

0.2% Global CO2

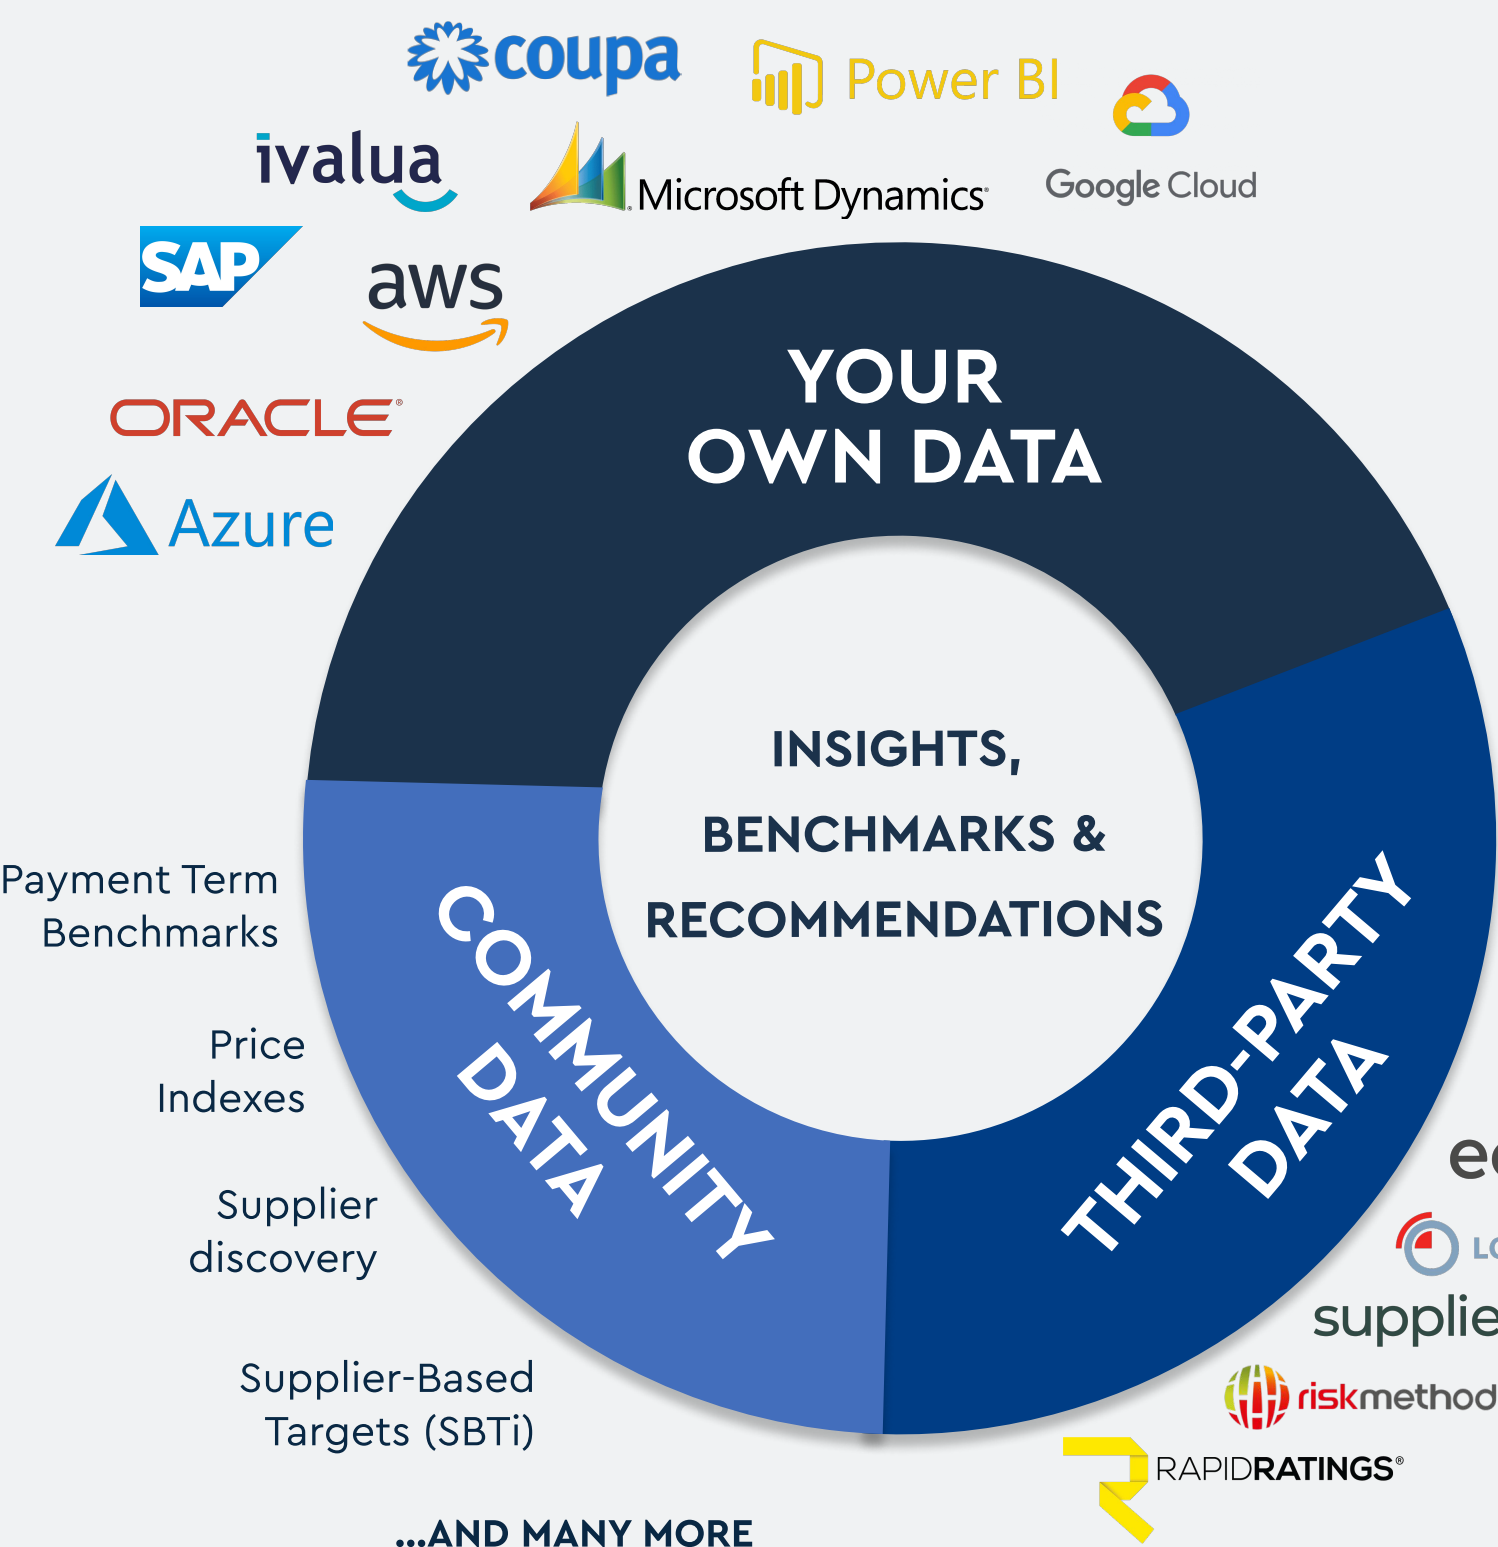

emissions processed annually across Sievo's analytics solutions

11+ bil. transaction

rows processed

9.5+ mil. material codes

across categories

360° view of your spend, categories & suppliers

Sievo combines **customer data** enriched with **customer specific** and **public external data**, and further enhanced with **community data** derived from across Sievo's customer base, providing comprehensive and insightful analytics, benchmarks and recommendations.

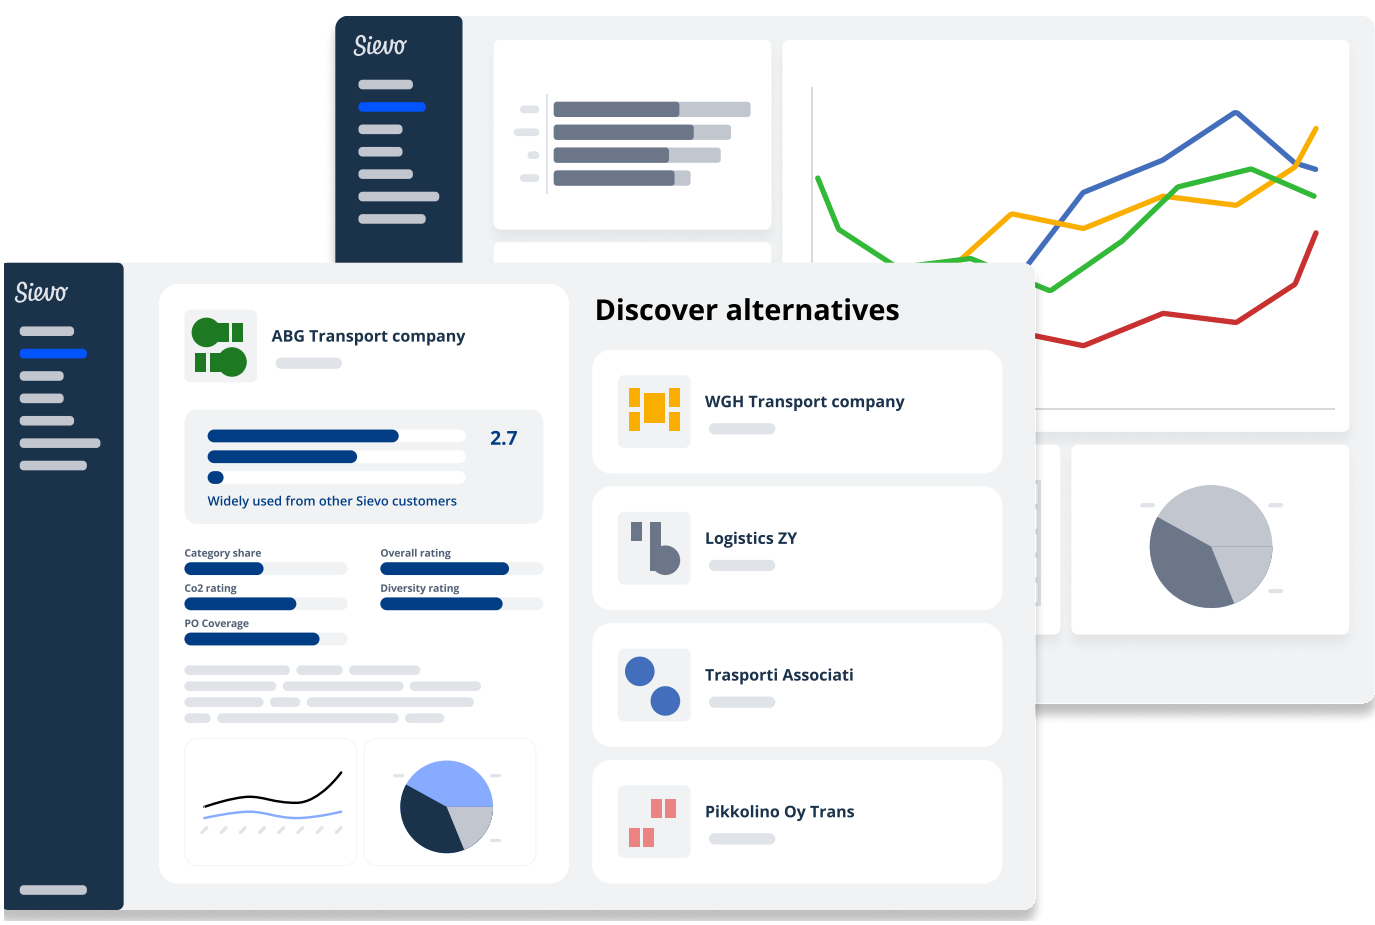

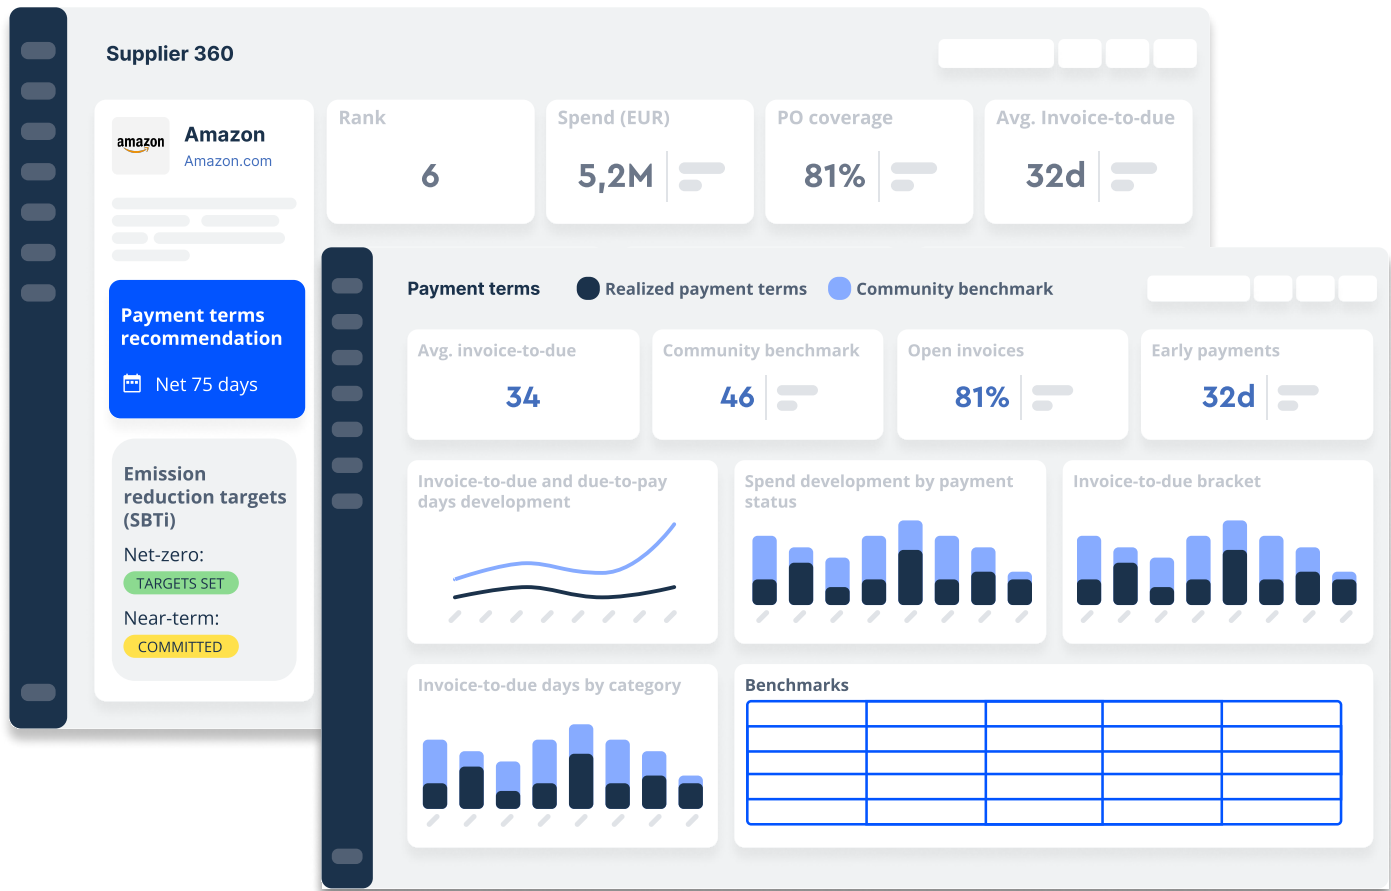

A new horizon in your procurement analytics

Transaction data-based benchmarks and intel that enable novel insights

Community benchmarks and recommendations

Compare your **payment terms** to community benchmarks across dimensions like **category**, **supplier country** and **supplier spend** to gauge performance and improvement potential. Utilize **AI-tailored, supplier-specific recommendations and insights to enhance working capital** by identifying suppliers with the greatest potential for extending payment terms.

Last 12 months actuals | 130+ level 4 categories | 130+ supplier countries

COMING IN 2025

Cost savings for non-commodities & supplier discovery

Track **price development** and uncover savings with Sievo's material and category price indexes. Leverage community data to **identify renegotiation opportunities** and secure favorable terms, even in non-commodities like MRO, lack benchmark data or require complex cost structures. **Discover commonly used suppliers** within the Sievo community, understand their business momentum, and **identify transaction-validated alternatives for sourcing opportunities** based on location or category.

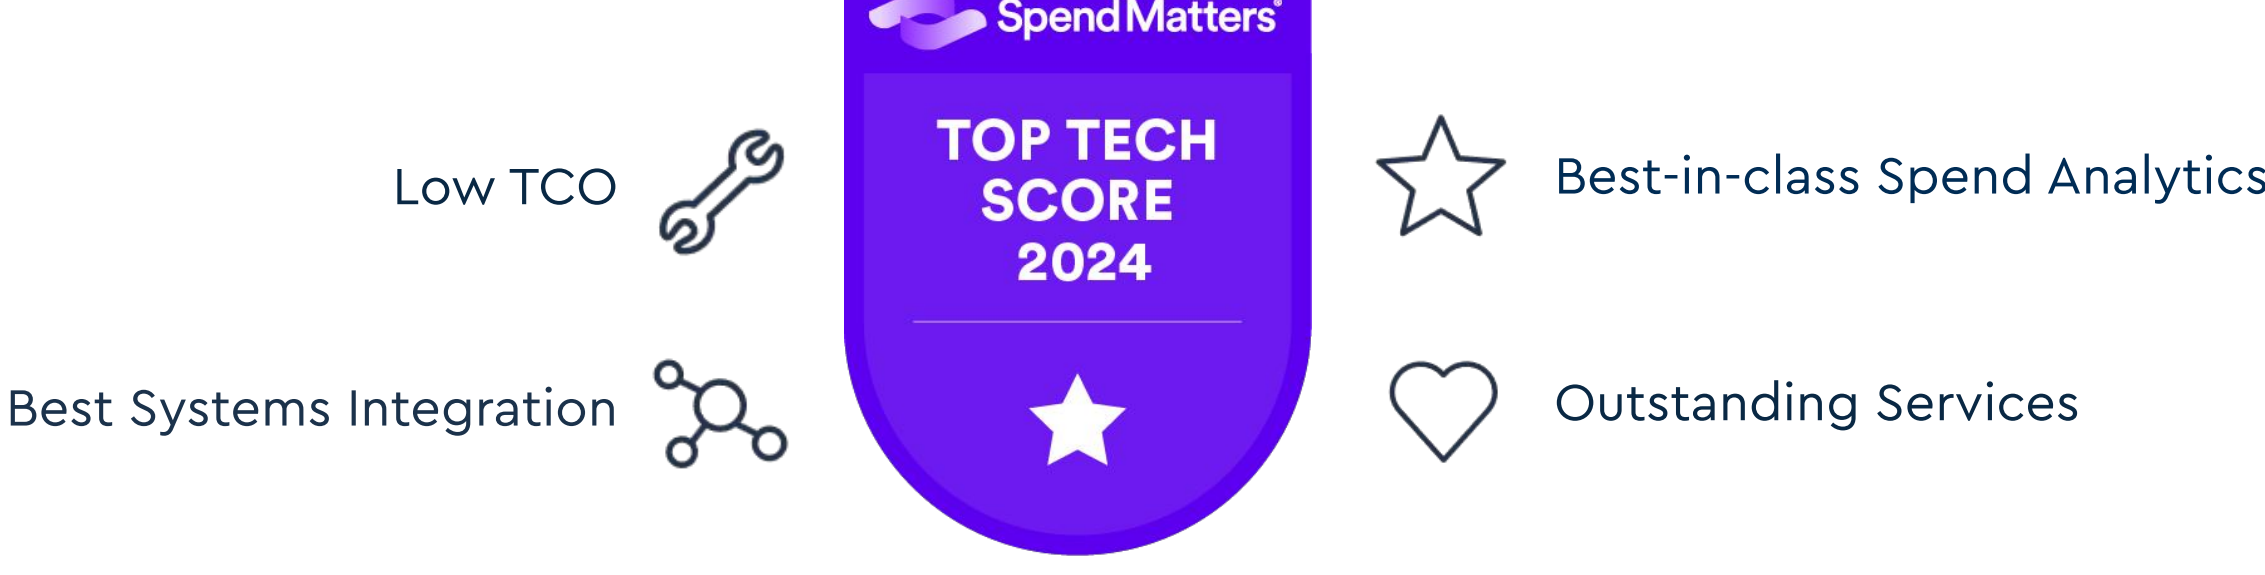

Sievo Community Data is powered by cleansed, anonymized and, aggregated data

The benchmarks or other community data sets do not contain any information that can be linked to an individual customer

The underlying data has gone through the standard Sievo process for cleansing and validation to ensure data integrity

Data reliability and anonymity are further ensured by requiring aggregation from at least three customers to establish a benchmark

#1 Procurement Technology Awarded by SpendMatters

Sievo's end-to-end data responsibility (extraction, cleansing, enrichment, harmonization, and classifications), software updates, maintenance, account support, certificates & onboarding materials are all included in Sievo's subscription.

Procurement excellence for large enterprises
