

All opportunities captured without the manual work

Gain up to 11% annual savings with actionable insights based on data you can trust.

Trusted by

Don't be the only one that's stuck in the past

With the current macroeconomic uncertainty, it's becoming harder for large enterprises to deliver savings and ensure supply continuity. Yet, Procurement still relies on traditional DIY tools. Spending endless resources to maintain the data and multiple tools while struggling to find opportunities in a sea of dashboards – and using even more time to decide on the next course of action. DIY tools simply cannot keep up. You're missing out on millions of dollars in savings opportunities and process efficiencies by not switching to a specialized Spend Analytics solution.

Drive more savings by closing the data-to-action gap

Get all the necessary **data, insights, and actions** in **one Spend Analytics solution** and reach your savings targets while ensuring a sustainable, resilient, and diverse supply.

Get started quickly and easily

By processing over 2% equivalent of the world's global GDP annually, our proven capability relieves companies from their data chaos. Sievo takes full responsibility of translating your data into trustworthy actionable insights.

Data

Automated data extractions

Got a complex procurement landscape and large data sets? Good, **Sievo automatically extracts the data from all your procurement systems without the manual work.**

Clean & reliable data

No matter the quality of your data, we **enable a single source of truth for everyone.**

Besides cleansing, translations and UoMs, we can even de-duplicate 6–23% of your materials for more savings opportunities.

Globally normalized suppliers

With **100+ million ERP suppliers** normalized and validated using the cross-customer data in **Sievo's database**, our **supplier parenting** leverages AI to deliver accurate results, fast. Gain a 360° supplier view of all your normalized and harmonized suppliers. Dig deep into supplier insights or make changes to the parenting results if needed.

Highest classification SLA guarantee

98%+ coverage | **94%+** accuracy | **deepest** granularity feasible

Sievo's AI-powered classification brings validated learnings from our cross-customer Community Data to your data. Spot a mistake? Simply re-classify in analytics.

Empower decisions with third-party data and cross-customer insights, recommendations and benchmarks

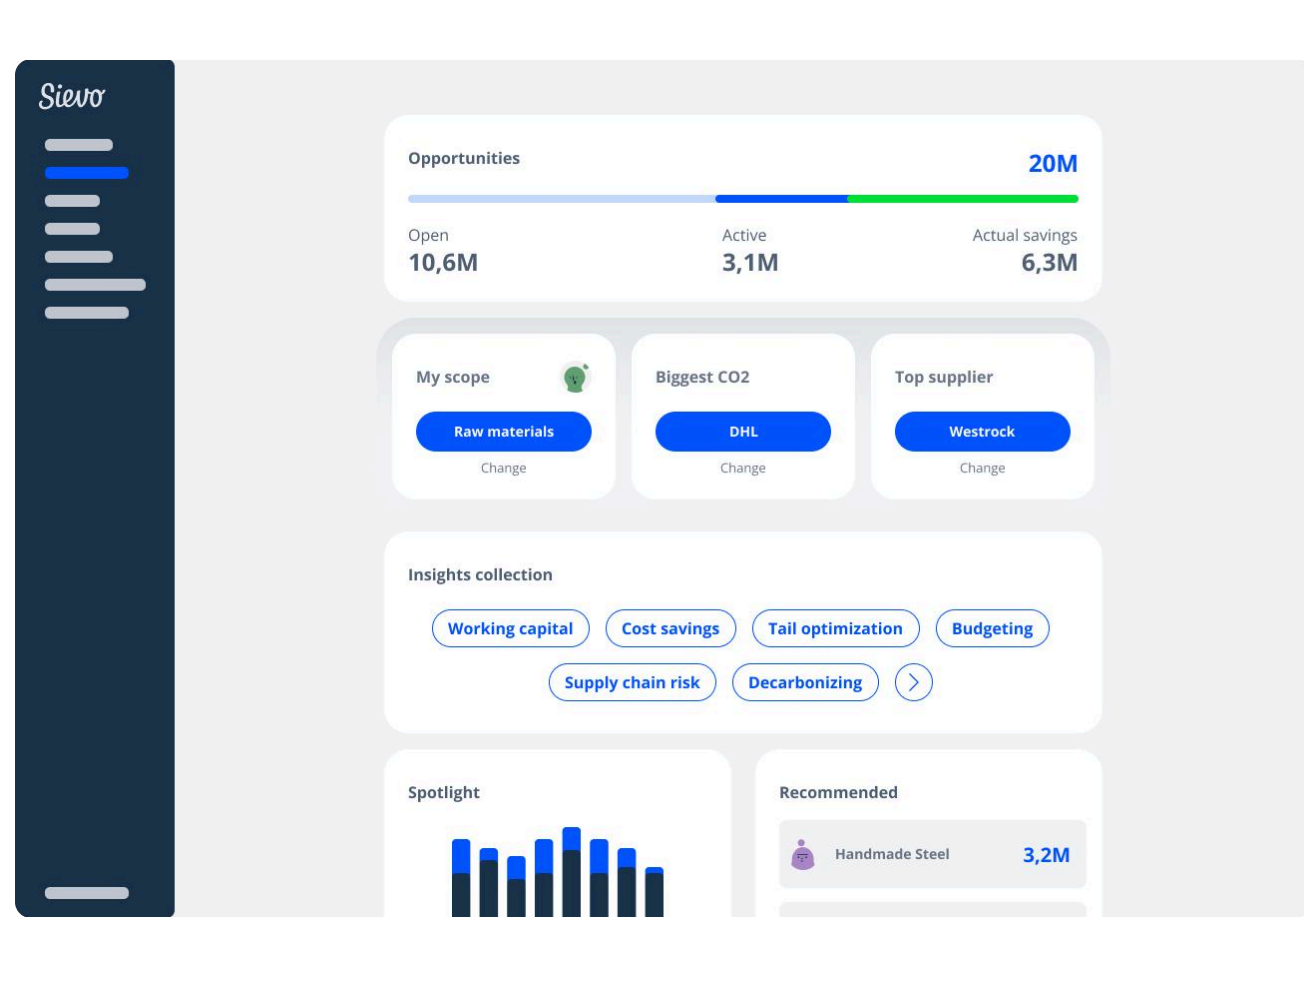

Sievo enriches all your internal data with **all third-party data sources you need** plus **Sievo's own Community Data**. You'll get more information about existing and new suppliers, payment term benchmarks, suggestions about suppliers committed to SBTi, and more!

Unlimited connections

Insights

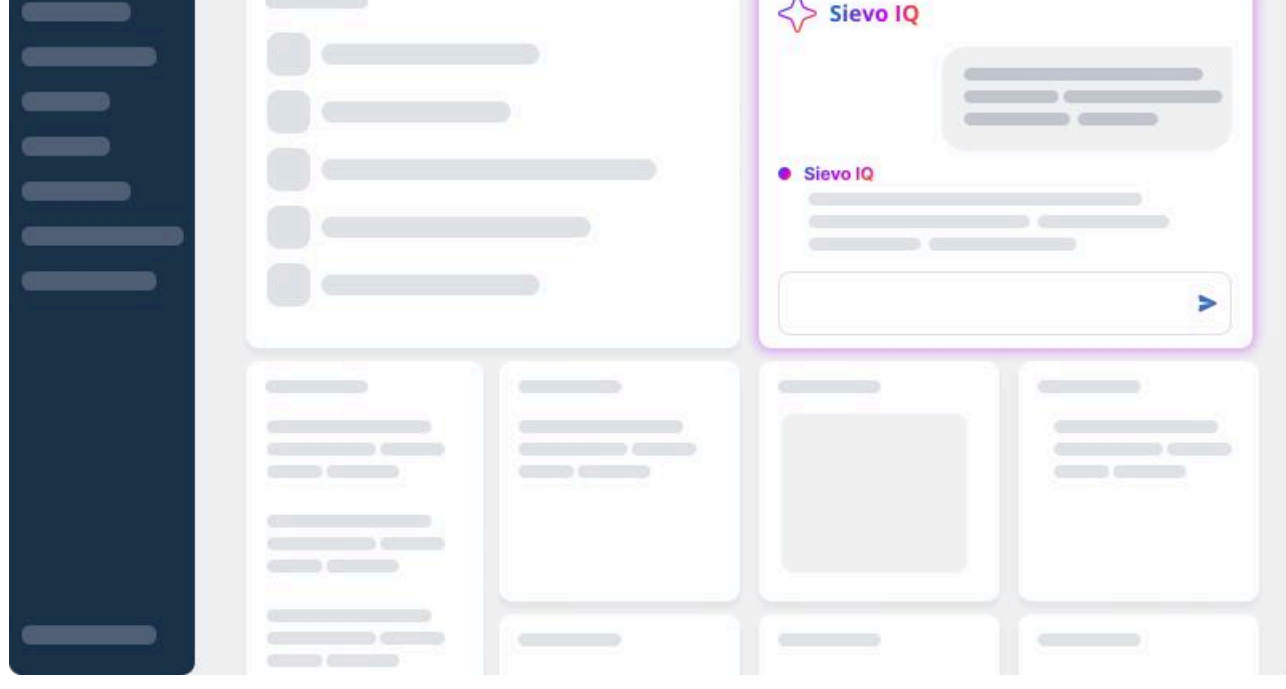

Save time with AI-powered insights you can trust

Make decisions with confidence, based on reliable data. Sievo delivers **actionable and highly personalized insights**, automating time-consuming analysis while **digging deep** across your entire data landscape. With Sievo's **holistic, granular set of Insight types**, you will achieve more savings, reduce your emissions or unlock other unexplored high-value opportunities like working capital improvements and tail spend.

Get accurate data in the right format

Leverage our 20+ years of experience with best-practice dashboards co-developed with industry experts.

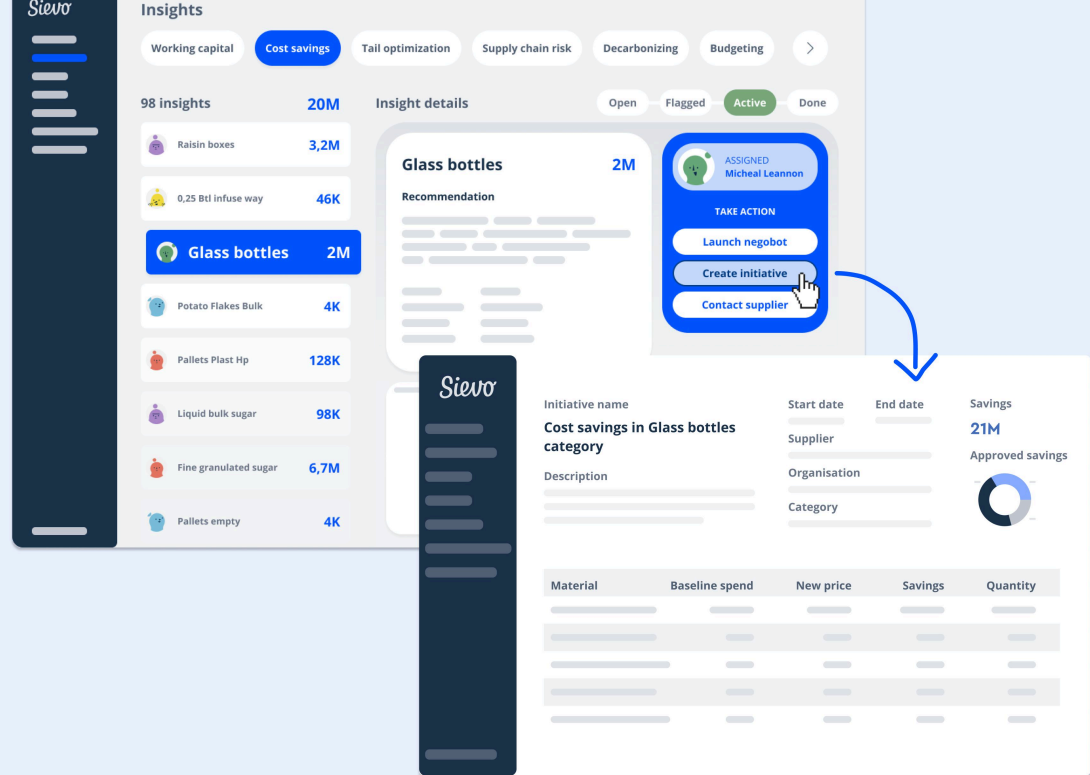

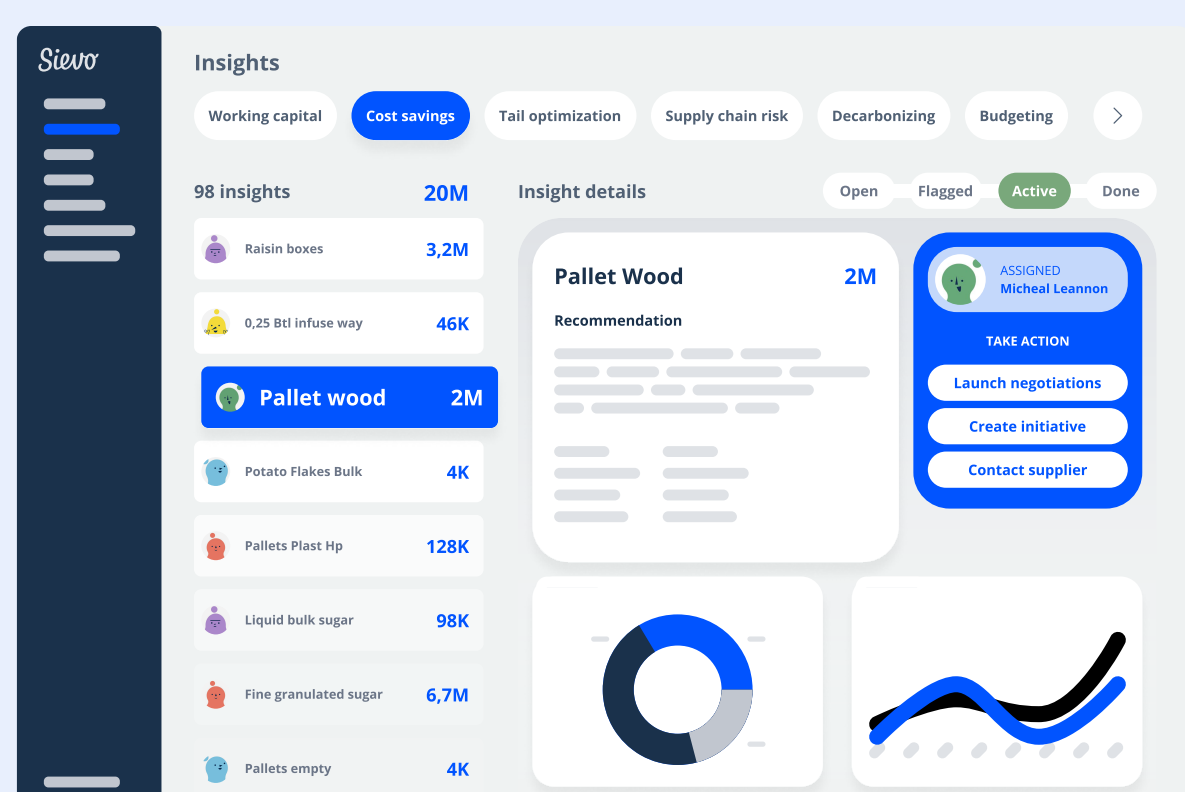

Improve procurement agility by maximizing process efficiency

Designed to orchestrate procurement decisions with AI speed and human understanding, Sievo IQ continuously lowers the barrier for advanced spend analytics. Or use Sievo's drag-and-drop Self-service functionalities – it's **suitable for every type of user** and **requires no technical knowhow** to build their own dashboards and charts for reports.

Actions

Capture more savings with less effort

Insights are only useful if they lead to actions. Within each personalized Sievo Insight, **automated actions** are available, enabling you to take action based on the insight given. **Flag, discard, or assign the Insight to others** – further improving the relevancy of future Insights based on your actions.

Turn insights into globally aligned initiatives

Substitute mundane and repetitive analytics tasks with **savings-capture automations**, such as AI-generated supplier emails. **Free up time and share your findings with key stakeholders** by turning the insight into a globally aligned initiative with a click of the button.

Unlock data-driven procurement excellence

Sievo continuously offers a future-proof setup, delivering value across different roles and functions with easy-to-use solutions.

Build trust with all your stakeholders

Select the most suitable suppliers, negotiate better terms, mitigate risks and ensure supply continuity

Attain high ROI without requiring IT in continuous use

Assure high user adoption with a dedicated account team and onboarding certifications

“ We all know that in procurement, volume equals better contracts. Shortly after implementing Sievo, we achieved cost savings of 8% on core category and 11% on overall procurement spending.

Evert Karsen – VP Global Procurement at Cimpress

“ Sievo has accelerated our transformation, creating a different level of conversation within the organization. We are so much more proactive, leading them, and helping to take decisions. We have moved from the backseat to the driving seat.

Marie-Pierre Goyenette – Chief Procurement Officer at CHC Sanofi

#1 Procurement Technology Awarded by SpendMatters
